LYNX EQUIPMENT

Tunnel Cage Washers - 500 Series

Conveyorized Washer with customizable configurations to meet new or existing building conditions. Complete flexibility with design features and options to efficiently clean cages, debris pans, bottles, feeder bowls and miscellaneous items.

Cage and Rack Washers - 400 Series

Large capacity, walk in washers with customizable configurations and knife-edge jets for the highest impingement to thoroughly clean racks, cages, debris pans, and miscellaneous items used in the care of laboratory animals quickly and efficiently.

Cage and Bottle Washers - 300 Series

Cabinet type washers with a reliable and robust oscillating spray header system. Total flexibility in design features and options to efficiently clean cages, bottles, debris pans and other miscellaneous items.

Bottle Wash Carts

The LYNX versatile Bottle Wash Cart is designed to couple with the feeder bottle washing system that is an available option on all of the 400 Series Cage and Rack Washers.

Cage Wash Racks

LYNX Wash Racks are extremely versatile, heavy-duty, stainless steel racks designed to securely hold rodent cages, filter tops, and debris pans for thorough efficient cleaning in a walk-in type Cage and Rack Washer.

Decontamination - 200 Series Chambers

High capacity, air tight, walk in chambers which are configurable to operate with VHP or Chlorine Dioxide agents.

Bedding Dispensers - 700 Series

Automatic Inline or Standalone Bedding Dispensers with the ability to adjust amounts of bedding per cage. Compatible with most bedding found in the industry.

Bottle Fillers - 100 Series

Inline or Standalone Bottle Fillers designed to be configurable with any bottle basket to meet new or existing applications.

Modular Walls

Custom designed wall that divides the clean and dirty areas of the Vivarium Wash Area, or enclose the service area of the equipment and protecting the workroom from excessive heat and noise.

Vacuum Bedding Systems

Clean and Waste Bedding material handling equipment. Designed and manufactured to unload, convey, store, and process, clean or waste bedding through the facility.
